SOME REASONS WHY YOU NEED CRISALIS:

1) It extends our 35+ years of expertise in Natural Resource Information Systems to your organization. 2) It ties 150+ apps together into an integrated Natural Resources Information System. 3) These are the best software apps that we have found over the past 35 years and we have never charged for FREE apps. 4) We have set up CRISALIS and the FREE software apps on a flash drive so that you can simply "plug and play" most of them. 5) You would have a hard time finding/getting many of these apps on your own. 6) In the process, you would probably corrupt your PC multiple times with malware, ransom-ware, spyware, viruses, etc. 7) CRISALIS provides Application Management Menus (for all 150+ apps it supports), that enable you to find, run, get help, back up, restore, refresh, get the status of an app AND your data. 8) CRISALIS provides very useful utilities to help keep your PC and handhelds running well. 9) Dividing the cost of CRISALIS by the total number of FREE software programs that come with it works out to less than \$20/app and \$1/dataset. 10) By purchasing CRISALIS, you are helping develop an All-In-One information system built by Natural Resource Professionals for Natural Resource Professionals. 11) You could easily spend 1000's of hours and \$100,000's re-inventing the "wheel".
